Matheus Nunes de Brito

Summary

Graduated in Systems Analysis and Development, during my university journey, I had the opportunity to join the Junior Enterprise Movement (MEJ) as part of the marketing team at Orc'estra Gamificação. There, we developed innovative solutions to different challenges through gamification. This experience was crucial for developing key skills such as critical thinking, complex problem-solving, and effective communication.

After graduation, I began my career in the data field, building a solid foundation in data engineering, data analysis, and the development of pipelines for processing large volumes of data. I have certifications and hands-on experience with technologies such as Azure, Power BI, SQL, Python, as well as frameworks like PySpark, Databricks, and workflow orchestration tools such as Airflow. My work focuses on cloud environments such as Azure and Snowflake, where I apply best practices to develop scalable and efficient solutions.

Passionate about problem-solving, business management, and data engineering, I always work with purpose, believing in the potential of youth entrepreneurship as an essential factor in the process of societal evolution and transformation.

Technologies

● Azure Cloud, AWS, Databricks, Azure Data Factory, Apache Airflow, Spark, PySpark, SQL, NoSQL, Data Warehouses, Data Lakes, Lakehouses, Python, Power BI, CI/CD, Git, React JS, React Native, Node.js.

Professional Experience

Cadastral Support Technician - Hospital Santa Marta

Brasília, Brazil

Mar 2023 – Aug 2024

Provided technical support to internal teams, maintaining registration systems and assisting with operational demands.

Improved the quality and efficiency of support processes by automating manual routines with SQL scripts.

Fullstack Developer

Brasília, Brazil

May 2021 – Aug 2022

Participated in the development of REST APIs using Java EE and Quarkus, focusing on performance optimization and integration with legacy systems.

Collaborated with frontend teams using Vue.js, ensuring seamless integration between backend and user interface.

Implemented unit tests (JUnit) and DevOps practices with Git for version control.

Marketing Advisor

Brasília, Brazil

Feb 2015 – Dec 2017

Developed gamification strategies to solve complex problems in various areas, promoting client and employee engagement.

Collaborated directly with multidisciplinary teams, developing campaigns and projects that integrated marketing and gamification to achieve measurable results.

Utilized marketing techniques, including artwork creation using CorelDRAW, Google AdWords campaign management, inbound marketing, internal marketing, and content marketing.

Education

● Systems Analysis and Development, Centro Universitário e Faculdade Projeção, Brazil. 2021 – 2024

Certifications

● EF Standard English Test (EF SET) - C1, Advanced English

● Business Intelligence Foundation Professional Certification BIFPC

● Scrum Foundation Professional Certification SFPC

Courses

- Fundamentals of Python Language for Data Analysis and Data Science - Data Science Academy
- Data Engineering Fundamentals - Data Science Academy
- Microsoft Power BI for Business Intelligence and Data Science - Data Science Academy
- Santander 2024 - AI Fundamentals for Devs – DIO
- Azure Databricks & Spark for Data Engineers (PySpark / SQL) - Udemy
- The Complete Hands-On Introduction to Apache Airflow – Udemy
